

# Insights

# *Wetland Integrity*

- Ability to focus on problem away from “home” with “experts” vital.
- Better to address one question (e.g. refuge) at a time.
  - 2x around 1 problem *rather* than 2 problems 1x around.
- More rapid progress through first iteration (i.e. 3-6 hrs)
  - Remove complexity
  - Be prepared to gloss over details – this is a process.
- Move forward/back through SDM process.
- Team understanding of the problem leads to more efficient progress. Problem statement is everything.
- Delphi method catalyst for focusing direction.
